Abstract (Basic): DE 3922677 A
        A portable information handling unit can be used to store
personal
    information and to allow transmission and reception of data via a
radio
    link. The unit has a magnetic strip reader (4) that allows stored
    reference data to be changed. Address data may be transmitted by
    operating a push button (8). A miniature loudspeaker (14) allows
    incoming information to be heard.
        Built into the unit is a comparator that operates on the
reference
    and input data. Access to the information requires entry of a code
via
    the keyboard (16).
        ADVANTAGE - Provides means of secured communication. (6pp
    Dwg.No.1/1)
